Year 10 Curriculum

All students in lower school at Comet Bay College study Mathematics, English, Science, Humanity and Social Sciences, and Health and Physical Education.

In Year 10, students study compulsory Physical Education, however, they are able to select 3 options in which to specialise. The options are to be selected from the following Learning Areas:

- The Arts
- Health and Physical Education
- Design and Technology
- Technology and Enterprise
 - Home Economics
 - Information, Design and Communication Technology

It is strongly recommended that students select options in which they have an interest, wish to pursue as a career or future studies, and have a particular strength in.

Some courses offered in Years 9 and 10 will lead to Certificate II qualifications, General courses or ATAR courses, respectively, this information is indicated in the tables provided at the conclusion of each Learning Area within this handbook.

Supporting Notes:

- *As the option areas are non-compulsory they incur specific fees, only when the fees for a course have been paid is a student's place in that course guaranteed.*
- *Where an optional course requires additional materials to be consumed by the student, the Compulsory Charge must be paid to cover the cost of those consumables (e.g. food ingredients, fabric, external tuition / venue hire etc). The cost of courses should be considered in the selection process.*
- *The college will endeavour to provide the first option whenever possible, however the reserve choice may be provided and this selection should also be carefully made.*
- *All these choices will be offered, however only those that have a viable number of students will actually run in 2017.*

We work very hard to ensure a high level of accuracy is maintained in the generation of our Course Selection Handbooks; however anomalies do occur from time to time. Occasionally, changes to course details may be necessary due to circumstances beyond our control.

The Arts

Clay (10CLAY) Charge \$85

This course is designed for those students who enjoyed Year 9 General Visual Art, Visual Art Extension and/or Clay and would like to continue to develop their skills with clay. Students considering studying ATAR Visual Art in Year 11 are strongly advised to study Visual Art in Year 10, preferably in the Extension pathway.

Students develop their skills in using a range of clays and associated materials, such as glazes and will typically complete three major projects over the course of the year. Students will create a reductive sculpture. They will also use the pottery wheel and investigate the world of ceramics. Towards the end of the year, students will have the freedom to devise their own clay project in negotiation with the teacher, which allows them to explore the clay skills they have developed during their art studies in lower school.

All Visual Arts courses include drawing and design, plus some art theory. Year 10 students examine the work of an artist and/or movement that relates to their production work. They will be introduced to Clay Art throughout history and will refine their critical analysis skills.

Concert Band and Vocal Tuition Charge \$60

This option is not selected via the Course Selection Process run by The College. The Arts Department manages selection of students for this option. Please contact Nadia Hall, Dean of The Arts for further information on **9553 8100**.

A tutor attends the college weekly to support students interested in performing with an ensemble. Vocal Tuition is provided in school for groups and individuals. Students attend 40 minutes per week, on a rotational basis.

NOTE:

This option is not timetabled as per other courses and therefore will not appear on the student timetable or the Student Billing Sheet. Families will be issued a separate invoice for charges applicable to this option within the course of the year.

Dance - General (10DAN)..... Charge \$60

This program allows students to explore the world of dance in detail, working on the following warm ups and routines in class:

- Flexibility
- Endurance and Strength
- Musicality
- Movement memory retention
- Dance Space

Year 10 students become the Critics, learning skills for review writing, enhancing awareness and attitudes towards dance, the opportunity to explore, interpret and use other media (sound, video, effects etc.) that have come together to combine dance art forms.

Assessment – Teacher/Student focus on practical:

Weighting throughout the year; 70% Practical, 30% Theory.

This course is available to all students, however places are limited.

Dance - Extension (10DANEX) Charge \$70

Prerequisites:

- Student will be auditioned for this course and need to achieve an A or B Grade in Year 9 Dance.

Semester 1

The focus is exploring the **Conventions of dance**. Students are introduced to the language of dance and the works of others. Through practical lessons, they learn safe dance practices, improve their physical competencies and acquire genre – specific techniques. The introduction of performance qualities and etiquette is integral to their development as performers. The elements of dance and processes of choreography are explored, and students solve structured choreographic tasks to produce works for performance.

Semester 2

Students have the opportunity to further develop their knowledge and understanding of dance language and apply it to both dance making and dance interpretation, exploring Dance as entertainment.

Students explore and investigate the elements of dance and processes of choreography to solve choreographic tasks for performance. They investigate ways to document their thinking and working practices to resolve personal ideas and refine reflection and decision making skills.

Students identify and explore design concepts which enhance the entertainment value of dance and place in its social, historical, political and economic context.

The investigation of selected dance works, past and present, addresses issues of style and form, and analysis develops students understanding of the concepts embedded in dance.

Assessment – Teacher/Student focus on practical:

Weighting throughout the year; 70% Practical, 30% Theory.

Drama (10DRA)..... Charge \$40

The major focus of this course is on developing improvisation and scripting skills as a foundation for further studies in Drama and Theatre. The emphasis is on practical experience in developing creativity, and appreciating theatre through improvisation forms in the history of drama and theatre. The application of skills developed will be used to build group devised plays. This extends to play writing and development of character.

Drama - Extension (10DRAEX)..... Charge \$70

Students have the opportunity to explore storytelling techniques, physical theatre and experiment with the complex skills of mask work. Practitioner based script work gives students an insight into the world of Stanislavski and Brecht, while a performance of a scripted monologue of their choice, builds the confidence needed to be a successful performer. This course is designed to be very enjoyable and an excellent grounding for the ATAR Drama course.

Throughout the year, students also have the chance to attend inspirational professional theatre productions to broaden the imagination and encourage the constructive analysis required for Upper School courses.

Media (10MED) and Media - Extension (10MEDEX)..... Charge \$45

Prerequisites:

- Student must be enrolled in GATE or Extension English to be considered for Media Extension.
- If a high number of students express interest, there will be an interview process.

In Year 10 Media Extension, students will explore media arts through representation, manipulation of genre, media conventions and analysis of media artworks. Students will work independently and in small groups, learning production skills and using a range of high-quality equipment. Students will create radio music videos, advertising campaigns, short creative films and satirical news bulletins. Using industry standard software, students will edit their recordings and footage, making artistic choices in post-production that will shape the look of their pieces. Along the way they will learn how to critically analyse visual texts, and understand the social, cultural and historical influences of media arts. There will be opportunities for students to enter their work into competitions.

Music (10MUS) Charge \$40

In Music students will be required to do the following: learn to read and write music, learn basic chord and rhythm skills on guitar, bass, drums and keyboard, participate in whole class singing activities, participate in song writing, recording and learning and performing music from a variety of genres. Students have time to form their own groups that they will rehearse and perform with during class time.

Music - Extension (10MUSEX) Charge \$45

This program caters for students with specific abilities in music. It is designed for students interested in exploring in greater depth the following areas of Music study: Composition, Musicology and Performance.

When students engage in Music Extension, they develop the capacity to communicate complex music ideas through their specialisation. Because music is a unique means of expression, of knowing and communicating experiences, it makes a profound contribution to personal, social and cultural identities. Students become adaptable and innovative problem solvers, making informed decisions and, as inquirers, develop their ability to deconstruct and critically evaluate. They sharpen their sensitivity and perception, raise their level of appreciation, and expand their musical horizons. The discipline and commitment of music-making builds a student's self-esteem, independence and personal motivation. Whether for career, commercial or leisure needs, students will have the opportunity to gain the basis for a lifelong engagement with music.

School of Instrumental Music (SIM) Charge \$40

This option is not selected via the Course Selection Process run by The College. The Arts Department manages selection of students for this option. Please contact Nadia Hall, Dean of The Arts for further information on **9553 8100**.

Students learning an instrument through the School of Instrumental Music (SIM) are required to learn music theory by enrolling in Classroom Music. Performing and rehearsing in the Comet Bay Concert Band is also a compulsory requirement of SIM students.

NOTE:

This option is not timetabled as per other courses and therefore will not appear on the student timetable or the Student Billing Sheet. Families will be issued a separate invoice for charges applicable to this option within the course of the year.

Visual Art (10ART) Charge \$85

This course is designed for those students who enjoyed Year 9 Visual Art (General) and would like to develop their skills in a wider variety of Visual Art studio areas. Students considering studying ATAR Visual Art in Year 11 are strongly advised to study Visual Art in Year 10, preferably in the Extension pathway.

Students will refine their observational drawing skills and typically complete three major projects over the course of the year including a drawing task (the human figure and/or portraiture), a sculpture, an acrylic or oil painting, and printmaking.

All Visual Arts courses include drawing and design, plus some art theory. Students examine the work of an artist and/or movement that relates to their production work and will refine their critical analysis skills and ability to understand the greater meaning of Artworks.

Visual Art - Extension (10ARTEX) Charge \$95

Prerequisites:

- Entry into the Visual Art Extension program is by application only.
Please contact Nadia Hall, Dean of The Arts for further information on 9553 8100.**

This course is designed for students who are serious about art, with talent and interest in Visual Art. Students considering studying ATAR Visual Art in Year 11 are strongly advised to study Visual Art in Year 10, preferably in the Extension pathway.

Visual Art Extension students will refine their observational drawing skills beyond the level offered in the General pathway. Students typically complete three major projects over the year including a life-drawing task, a sculpture, and an oil painting (portraiture). Students in this course also participate in excursions, incursions and work on projects with visiting artists when the opportunity arises.

All Visual Arts courses include drawing and design, plus some art theory. Students research the work of an artist and/or movement that relates to their production work. They will refine their critical analysis skills and ability to understand the greater meaning of Artworks.

Overview of possible The Arts Pathways for Years 7 – 12

Year 7	Year 8	Year 9	Year 10	Year 11	Year 12
Music	Music	Music	Music	CERT II in Music	CERT III in Music
Music Extension	Music Extension	Music Extension	Music Extension

	Media	Media	Media	Cert II in Creative Industries	Cert II in Creative Industries
		Media Extension	Media Extension		

Health and Physical Education

All students must participate in Health Education and General Physical Education throughout Years 7 – 10.

The Development Programs are available via selection trials only. If places become available at the end of each term, students will be selected on the basis of their demonstrated ability and commitment to the particular area of study.

Australian Football Specialist Program (10FOOT)..... Charge \$220

The Comet Bay College Australian Football Specialist Program is designed to be a consistent learning program over Years 7 to 12. This program is designed to provide students with ongoing development in the skills and attributes needed to play Australian Rules Football at the highest level. Students will be exposed to Specialist Coaching and will study and practise offensive and defensive skills, advance strategies and tactics, and work towards the level of conditioning required, while practising both umpiring and coaching roles.

Students will focus on goal setting and will have regular individual reviews to assess their development within the program with assistance given to reach each selected goal.

The Comet Bay College Australian Football Specialist Program will invite talented players to participate each year.

NOTE:

Additional optional costs may be required to cover training camps and touring matches. A pre-season camp is normally held each year which may cost up to \$150. These will appear on the Additional Extra Cost Options table provided within the 2017 Voluntary Contributions and Charges Handbook, disseminated to families in December 2016 for the 2017 Academic Year.

Basketball - Extension (10BAEX) Charge \$50

This course is designed for the Basketball player that is looking to improve all aspects of their complete game. The program will work on all aspects of the sport with skill, tactical, game-play and fitness elements being the key focus.

Fitness Education (10FIT) Charge \$100

This course looks at introducing students to the components of fitness and principles of training across a range of disciplines including circuit, boot camp, aerobics, strength and conditioning, combat and core stability.

Emphasis will be placed on the execution, teaching and delivering of correct techniques for individual exercises. Students must be prepared to experience all aspects of fitness for a range of target groups e.g. sport specific, health related and special populations.

Fitness Testing will be carried out throughout the program.

NOTE:

Additional optional costs may be required to cover training camps and competitions. These will appear on the Additional Extra Cost Options sheet within the 2017 Contributions and Charges Handbook, disseminated to parents around 1st December 2016.

Outdoor Education (10OUT) Charge \$150

Prerequisites:

- Entry to this program requires participants to be able to swim 100 metres unassisted, and to float and tread water for at least 3 minutes.**

This program is designed to develop competence in dealing with the natural environment in a safe manner. Classes will include theory sessions which prepare the student to interact with the environment with minimum impact. Students will gain an understanding of emergency responses to a range of unpredictable outdoor challenges, e.g. survival swimming, first aid, travel skills and survival skills.

Students must be prepared to work in a wide range of aquatic, as well as land environments. Students will take part in activities ranging from problem solving and leadership activities, navigation, orienteering, expedition planning, roping, camp cooking and emergency first aid.

An additional charge of up to \$100 may be required for an optional off-site camp.

NOTE:

Additional optional costs of up to \$100 may be required to cover for an optional off-site camp. These will appear on the Additional Extra Cost Options sheet within the 2017 Contributions and Charges Handbook, disseminated to parents around 1st December 2016.

Physical Education - Extension (10PEX) Charge \$46

This course is designed to cater to those students who excel in their sporting endeavours. The program covers sports and theoretical components not covered in the General Physical Education Program, and provide enrolled students with opportunities to travel away from the college campus to experience a range of sporting facilities offered within the community.

Surfing Development Program (10SURF) Charge \$100

This program is designed to provide a select group of students with the opportunity to develop and extend their skills in surfing, beach and water safety and other aspects of surfing including weather and competition surfing. The 'Big Wave Surfing School' will provide coaching, and students will be able to gain Surfing Levels Accreditation as set out by Surfing WA.

Two hours of this course will be undertaken outside school hours.

Students will be able to nominate to try out for this course, and will have to undergo a selection process of trials.

NOTE:

Additional optional costs may be required to cover training camps and competitions. These will appear on the Additional Extra Cost Options sheet within the 2017 Contributions and Charges Handbook, disseminated to parents around 1st December 2016.

Sport and Community Leadership (10SPLC)..... Charge \$75

This Course is designed to be a consistent learning program throughout Year 10 with pathways into Years 11 and 12.

The purpose of this course is to produce responsible, motivated and confident people who can lead safe, purposeful and enjoyable sporting and recreational activities. It has been designed to encourage students to get involved in organising and assisting with the provision of sport and recreation in the local area.

Students who participate in this course are expected to be ambassadors in the area of health and well-being within the college and local primary schools. Throughout the course, students will gain knowledge in organisational skills, safety in sport, other recreational agencies, fitness training practices and competition structure. Students will have the opportunity to gain coaching and officiating awards in a variety of sports. By completing this course, students will be able to make a start on the community service that all students must participate in during their senior years at school.

Students will be asked to apply to participate in this course and clear selection criteria will be published. Students will be selected from their application and their previous interest in this area at Comet bay College.

NOTE:

Additional costs may be required for National Coaching Accreditations. These will appear on the Additional Extra Cost Options sheet within the 2017 Contributions and Charges Handbook, disseminated to parents around 1st December 2016.

Soccer Development Program (10SOC)..... Charge \$50

This program is designed to provide students with ongoing development in the skills and attributes needed to play soccer. Through this program, students will be exposed to individual skill development with the knowledge and tactics that could be transferred to higher order levels of application in Year 11 Physical Education Studies.

Students will also have the opportunity to develop their umpiring skills with a Level One Accreditation.

The Soccer Development Program will be offered through specific drills and training in lessons alongside games and matches with other schools.

Students will be able to nominate to try out for this course and will have to undergo a selection process of trials as places are limited.

NOTE:

Additional optional costs may be required to cover training camps and touring matches. A pre-season camp may be held which may cost up to \$150. These will appear on the Additional Extra Cost Options table provided within the 2017 Voluntary Contributions and Charges Handbook, disseminated to families in December 2016 for the 2017 Academic Year.

Triathlon Development Program (10TRI)..... Charge \$100

This program is an exciting sport involving the disciplines of Run, Bike and Swim. Training for the sport of Triathlon also helps young people to develop good lifestyle and exercise habits.

Students involved in the Triathlon Development Program will be exposed to the latest training techniques for the sport with state of the art facilities and equipment provided by the college. Each student will receive coaching by highly qualified and experienced staff and will participate in training programs for cycling, swimming and running to a level that will allow them to participate in races if desired.

Overview of possible Physical Education Pathways for Years 7 - 12

Year 7	Year 8	Year 9	Year 10	Years 11 and 12
Physical Education	Physical Education	Physical Education	Physical Education	Certificate II in Sports Coaching Certificate II in Sports Recreation General Physical Education Studies or ATAR Physical Education Studies
		Physical Education Extension	Physical Education Extension	
AFL Specialist Program	AFL Specialist Program	AFL Specialist Program	AFL Specialist Program	
	AFL (girls)	AFL (girls)		
	Surfing	Surfing	Surfing	
	Soccer Development	Soccer Development	Soccer Development	
	Basketball Extension	Basketball Extension	Basketball Extension	
		Outdoor Education	Outdoor Education	
			Sports Community Leadership	
			Triathlon Development	
			Fitness Education	

Technology and Enterprise (Home Economics)

In the Home Economics area, Year 10 students will develop skills studied in Year 9 to further extend their practical skills in textiles and foods in preparation for Upper School Courses of Study.

Caring for Children (10CHILD)..... Charge \$80

This course involves working with young children, developing activities and the observation of children through stages of development. Kindergarten activities, leading regular playgroup or day care, child development from birth to 5 years are examined.

Practical activities may include the preparation and serving of food for toddlers, making toys and musical instruments. Real life baby simulators are used to provide real life and practical awareness of taking care of babies.

Fashion and Style (10FASH)..... Charge \$100

This is a creative yet challenging course that looks at many aspects of fashion and design including safety, sustainability practices, design, production and evaluation. Students will develop their sewing skills on the machine, as well as expand on their ability to create and produce quality products. Students will be exposed to the complex design process of responding to a design brief, selecting appropriate materials and following a time line. Let your imagination and innovation be unleashed!

Food Technology (10FOOD)..... Charge \$110

This course is an irresistible Australian culinary adventure, inspired by global influences. Students gain knowledge about nutrition and how it links to a healthy lifestyle. Basic local food commodities are the focus of each week and students explore the factors that influence their food choices. Students prepare meals suitable for breakfast, lunch and dinner in a hospitality grade commercial kitchen. The course culminates with a design task of preparing a celebration 3 course meal for selected guests.

Overview of Design and Technology (Home Economics)

Pathways for Years 7 - 12

Note: Each year whether a course will run depends on student selection creating viable classes.

Year 7	Year 8	Year 9	Year 10	Years 11 and 12
Home Economics	Food Science	Food Science	Food Technology	General Food Science and Technology
	Fashion and Textiles	Fashion and Textiles	Fashion and Style	General Materials Design and Technology – Textiles
	Caring for Children	Caring for Children	Caring for Children	General Children, Family and the Community

As a number of students select Home Economics Courses in Lower School and then in Upper School, depending on availability, the following certificates may be introduced: Certificate II Kitchen Operations; Certificate II Applied Fashion, Design and Technology.

Design and Technology

CAD/CAM (10CAD) Charge \$110

CAD/CAM (Computer Aided Design / Computer Aided Manufacturing) is an exciting STEM course that allows students to use their creativity to develop solutions to real world problems, needs and opportunities.

Computer Aided Design (CAD) and Computer Aided Manufacturing (CAM) allow students to take an idea and turn it into reality faster than using manual production techniques and to a much higher standard. CAD/CAM course students will start drawing in 2 dimensions and move on into 3 dimensional drawing.

Computer Aided Manufacturing facilities at Comet Bay College include subtractive rapid prototyping machines like CNC mills, laser cutters and plasma cutters for cutting metal. The recent explosion onto the market of affordable 3D printers means that students will also be able to create 3D drawings and produce them.

The software used in the CAD/CAM course is industry standard and provides students with a workplace ready skill and the ability to easily move from one software platform to another in the industry. The AutoCAD software taught in the course is the standard in industry, TAFE and University, giving student an edge in further education and training.

The ability to use CAD/CAM will benefit students studying Engineering, Metal and Wood in Years 11 and 12.

Electrical (10ELE)..... Charge \$100

This course provides students with an introduction to the electrical trade field. Students develop knowledge of electrical theory and principles as well as construct electrical circuits, installation, solder electronics circuits and use test equipment.

Electrical will provide a solid foundation and creates opportunities for students who wish to work with the latest in computer technology, software, control systems, building automation, audio-visual technology and electronic components and appliances.

Engineering -Mechatronics (10ENGM) Charge \$100

Engineering is an exciting STEM course that focuses on solving problems and overcoming challenges using technology focused solutions. Our course will foster your creativity, practical and problem solving skills and turn ideas into reality by applying lateral thinking to develop solutions to real world problems, needs and opportunities.

You will develop skills and knowledge in the electro-technology field, robotics, coding and Computer Aided Drawing (CAD). You will have the opportunity to develop solutions using innovative Computer Aided Manufacturing (CAM) technologies such as, microcontrollers, 3D printers, Laser cutters and CNC mill to help you produce solutions.

Jewellery (10JEW)..... Charge \$100

This course draws on and expands transferable skills developed in Year 9 Design and Technology and introduces students to the manipulation of metals using a wide range of tools, processes, materials and systems. Some new processes to be developed will include, but not be limited to, silver soldering, casting, forming, drilling, cutting and polishing of a range of materials used for ornamental purposes.

Some of the work will require design and planning using the Technology Process with literacy and numeracy skills consolidated in practical applications such as quantity and cost estimations. Health and Safety aspects will be taught and reinforced at all times. Students will learn how to conduct a risk assessment and job safety analysis in a range of industrial settings.

Mechanics (10MSM) Charge \$100

This course is designed to complement the Year 9 Small Machines Course and is an essential prerequisite for Engineering – Mechanical in Year 11.

The course will cover the operation of multi cylinder engines. Students will learn about the operation of petrol and diesel engines in both two stroke and four stroke configurations. They will also learn about systems that operate in unison with single and multi cylinder engines, such as, power generation, pumping of fuel and lubricant.

Students will also learn about some basic automotive components such as brakes, steering, gearing, clutches differentials etc. Students will produce a work package from theory lessons that will serve as a valuable future reference, both in and out of school.

As in all workshop courses students will be required to adhere to Occupational Health and Safety practices at all times. These practices include but are not limited to correct footwear and safe behaviour.

Metal Technology (10MET) Charge \$100

This course draws on and expands transferable skills developed in Year 9 Design and Technology and introduces students to the manipulation of metals using a wide range of tools, processes, materials and systems. Some new processes to be developed will include but not be limited to, fuel gas and electric welding processes, forging, machining, fitting, drilling, grinding and polishing of a range of metals.

Some of the work will require design and planning using the Technology Process with literacy and numeracy skills consolidated in practical applications such as quantity and cost estimations. Health and Safety aspects will be taught and reinforced at all times. Students will learn how to conduct a risk assessment and job safety analysis in a range of industrial settings.

Wood Technology (10WOOD)..... Charge \$100

This course draws on and expands transferable skills developed in Year 9 Design and Technology and introduces students to the manipulation of wood and wood products using a wide range of tools, processes, materials and systems. Some new processes to be developed will include but not be limited to, biscuit joining of boards and frames using a range of adhesives, use of pneumatic and electric tools.

Some of the work will require design and planning using the Technology Process with literacy and numeracy skills consolidated in practical applications such as quantity and cost estimations. Health and Safety aspects will be taught and reinforced at all times. Students will learn how to conduct a risk assessment and job safety analysis in a range of industrial settings.

Overview of Design and Technology Pathways for Years 7 – 12

Year 7	Year 8	Year 9	Year 10	Years 11 and 12
Design and Technology	Jewellery	Jewellery	Jewellery	General Wood General Metals
	Wood Technology	Wood Technology	Wood Technology	
	Metal Technology	Metal Technology	Metal Technology	
	Mechanics	Mechanics	Mechanics	
	CAD/CAM	CAD/CAM	CAD/CAM	General Wood General Metals General Engineering or ATAR Engineering
		Electrical	Electrical	General Engineering
	Engineering - Mechatronics	Engineering - Mechatronics	Engineering - Mechatronics	General Engineering or ATAR Engineering

Technology and Enterprise **(Information, Design and Communication Technology)**

Please note that set costs cover all materials used in the standard tasks set for Design and Technology courses. However, students will be required to pay for materials where their designs go beyond the quantities or types of materials that are standard to the courses.

Business Management and Enterprise (10BME) Charge \$35

This course aims to expose students to the role of business in our society, covering such topics as:

- Industries;
- Marketing;
- Contracts and rights;
- Employment – rights and responsibilities.

The course also includes making students aware of the cost of independent living (life skills) covering such topics as:

- budgeting – includes covering utilities;
- insurance costs;
- wants versus needs;
- Financial decision making such as the use of credit cards.

Students complete this course using software applications as a tool for production – please note this is not a secretarial course.

Computer Science (10COM) Charge \$50

Information and communication technologies are integral to the 21st century global village and economy. Everyone is influenced by computers in some way. Whilst we all use computer systems as a means to an end, it is vital to develop an interest in the intricate workings of computer systems so that future generations have the knowledge, understanding and skills to create and maintain computer systems.

This course is useful to all students - those who will study or work with computers, those who desire a general knowledge of computers, or those who are interested in computer science as it applies to fields of employment.

The Lower School Computing Courses will cover a basic understanding of computer systems, computer component, flowcharts and research topics of interest in the world of computers and, an introduction to the role that computers play in today's society.

The Lower School Computer Course has been designed around the following essential understandings:

- Technology is a tool in our everyday life;
- Technology helps us retrieve and present information;
- Technological progress presents new possibilities and challenges.

The computer curriculum covers the following topics: computer hardware, word processing, spreadsheets, database, multimedia (animation and graphics), Internet usage, computer ethics and safety, and programming (algorithms). This course inspires students to exercise both the creative and logical hemispheres of the brain. Through fun and challenging projects, students will use their imaginations, hone their planning and problem solving skills, learn how to use media tools and discover fundamental concepts pertaining to the use of computer in society.

Students will develop skills in problem solving and programming in future studies in Applied Information Technology / Computer Science and will be given the opportunity to demonstrate high levels of design and creativity for future studies in Photography / Graphic Design.

This course provides the foundation for future studies for Stage 2 Computer Science (based on Teacher recommendation) and Certificate II Information, Design and Media Technology.

Computer Science - Extension (10COMEX) Charge \$65

TO SELECT THIS COURSE, STUDENTS MUST BE RECOMMENDED BY THEIR TEACHER.

Students will be expected to achieve:

A or B Grade in Year 9 Computer Science

The focus for this course is the same for Computer Science - General, but key aspects are studied in greater depth and breadth. This course aims to make students academically ready for the rigour of studying ATAR Computer Science in Year 11 and leading to Computer Science courses offered through TAFE.

The following areas will be studied:

- Computer hardware and software;
- Assembling and fixing computers;
- Programming and game making;
- Computer networking;
- Animations and web design.

Design Photography (10PHOT) Charge \$70

The focus for this course is the study and application of basic composition techniques and the application of Design principles in photographic works using digital photographic equipment and state of the art software. Students understand that photography is a discipline area with its own history, traditions, styles and techniques.

Students are introduced to composition elements and design principles and photography design processes and practice. They are introduced to the design process from the moment of ideation (forming ideas) to the final making and presentation of final prints (photographs). Students will learn a range of techniques from landscape designs to portrait styles demonstrating their abilities to effectively use light, equipment, materials and technologies to compose and design their photographs.

In this course, students will explore the latest developments in digital photography. Students will utilise a variety of software packages, including Photoshop and InDesign and will be introduced to the latest SLR Camera technology. Legal and ethical issues as they relate to the use of media and information sharing will be addressed.

This course provides the foundation for future courses in Design Photography in Years 11 and 12 based on Teacher recommendation.

TO SELECT THIS COURSE, STUDENTS MUST BE RECOMMENDED BY THEIR TEACHER.

Students will be expected to achieve:

- A or B Grade in Year 9 Photography**

Semester 1 – Students will:

- Complete a brief overview of the basic understanding of Photography.
- Understand the use and application of the SLR Camera Technology, control settings and functions.
- Learn how to apply design concepts and principles/elements in photographs.
- Demonstrate understanding of and apply composition elements (camera works), and design elements and principles (ingredients of a successful designed photograph).
- Complete small tasks and work assignments to get a fundamental education on the mechanics of taking a photograph.
- Conduct studies into fashion photography and learn how to apply studio lighting photography techniques to their own fashion shoots.
- Learn Photoshop skills focusing on Photo editing techniques and retouching techniques.
- Demonstrate the ability to compose photographs with meaning.
- Study communication techniques – Sign and Icons, Symbols, Signifiers, Codes, Semiotics and Semantics.

Semester 2 – Students will:

- Be engaged in larger production tasks in: Commercial Photography and Environmental Photography.
- Be exposed to criteria in the creation of a Photographic Portfolio as a requirement for the ATAR Design course in Upper School.
- Be given the opportunity to engage in a design process, similar to the one used in ATAR Design, as pure practice to successfully design photographs for a specific design product.

Both semesters – All students will:

- Become members of Comet Bay Production Team. Students will be responsible for photographing school events like Awards ceremony, ANZAC ceremony, and other school publicity events. Students will be given the opportunity to engage in photographic work, working on various amounts of different types of photography compositions as one of the curriculum requirements for this course.

Overview of Information, Design and Communication Technology Pathways for Years 7 - 12

Year 7	Year 8	Year 9	Year 10	Years 11 and 12
Computing	Design Photography	Design Photography Design Photography Extension	Design Photography Design Photography Extension	General Design Photography or ATAR Design Photography Certificate II – Information, Digital Media and Technology
	Computing Robotics	Computing Computer Science Extension	Computer Science Computer Science Extension	ATAR Computer Science Certificate II – Information, Digital Media and Technology
	Business Management and Enterprise	Business Management and Enterprise	Business Management and Enterprise	General Business Management and Enterprise

Student Information on the Unique Student Identifier (USI)

Unique Student Identifier Number Application

The recent implementation of this new reform requires all students enrolling into Nationally Recognised Courses to obtain a USI number. Comet Bay College offers a wide range of Nationally Recognised Courses to its students and therefore requires **all** students to obtain their individual USI.

Please visit the link below to apply for your child's USI and forward the allocated number to Comet Bay College Administration.

NOTE:

- Please take care to record the number accurately; we may need to contact you in the event an error is made.
- Applications **MUST** be made using the student's LEGAL first name AND LEGAL surname.
- You will be required to provide details from your current Medicare Card and an additional form of ID (for example Drivers Licence). Please have them on hand prior to starting your application.

Further, more comprehensive information regarding the USI is available from the USI website www.usi.gov.au.

START YOUR APPLICATION HERE:

<https://www.usi.gov.au/students/create-your-usi>

Problems With Your Application?

Unfortunately, college staff are not able to assist with any technical issues you may experience in submitting your application. **Please refer to the USI website for contact details in the event you require support.**
